

Taoglas Waste Insights™ for Smart Waste Management

A New Era in Waste Management

We are on a mission to integrate technology into the world's most resource intensive industries, to drive resource efficiency, improve safety, ensure operational improvements, and reduce CO2 emissions.

The **Taoglas Waste Insights™** solution enables real-time insights and intelligence to help your enterprise optimize your waste assets with real-time data and analytics anywhere, anytime.

Typical Applications

- 
Waste and Recycle Bins
- 
Smart Cities
- 
Telematics
- 
Document Shredding
- 
Commercial Haulers
- 
Construction
- 
Clothing Donation
- 
Agriculture
- 
Smart Campus

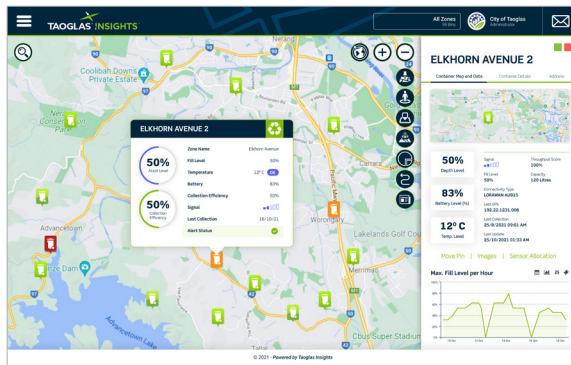

Taoglas Waste Insights™

Taoglas Waste Insights™ will immediately increase efficiency in the collection of waste and its environmental impact.

Bin Sensors

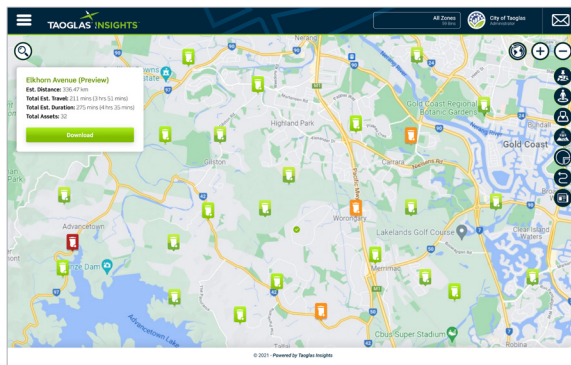

The world's most advanced waste sensor for public space waste bins.

Software Insights

A comprehensive, waste asset and team management platform.

- Asset Management
- Fleet Management
- Operation Management
- Citizen Management
- Smart Waste Analytics
- Sustainability Reporting

Navigator

A robust and integrated route and predictive management platform for your operational teams.

“We design, develop, manufacture and implement IoT devices to connect data from everyday items to the people that need the information most.”

Taoglas Waste Insights™

Taoglas Waste Insights, allows you to manage your entire waste management solution from one integrated platform. Taoglas Waste Insights alerts waste collectors when waste containers are full and require collecting. From your web-enabled device, Taoglas Waste Insights provides real-time data exactly when you need it.

The platform enables waste teams to access detailed reports and analytics on waste operations, complete scheduling, routing and resourcing tasks, and use the predictive analytics and notification tools to determine which bins to collect and when.

Taoglas Waste Insights™ Delivers

It is our mission to drive return on investment back into your organisation, to reduce risk, and to increase value. Above all, we want to maximise your investment by reducing time, costs, and resources in your smart waste journey by...”

Reduce Operational and Infrastructure Costs

- Reduction of the number of vehicles
- Reduction of the number of waste bins
- Reduction of fuel costs
- Reduction of service cost

Reduce Environmental Impact

- Reduction in CO2 emissions
- Reduction of overflowing waste bins
- Reduction of noise level
- Reduction of fuel

Provide Deep Insights and Analytics

- Fleet analytics (route optimization)
- ESG and Sustainability analytics
- Material generation and volume analytics
- Resource allocation analytics
